

# Secure payment over the Internet

## Maximum security for your Internet purchases

With Banco Sabadell debit and credit cards you can safely make purchases at the e-businesses which have this type of Secure Payment activated; "Verified by Visa" for Visa cards, or "MasterCard Secure Code" for MasterCard cards.

When paying for your internet purchase you will need to enter a code to finalise the operation. The system will then authenticate that it is you and not another person performing the operation.

## Activation or deactivation service for cards used online and abroad

With this service you can control the use of your debit or credit cards by activating or deactivating the restriction on online purchases or for use abroad, using the cards only when you are going to make a purchase online or if you are travelling, and deactivating it when you have completed your payment or at the end of your journey.

To use this service, you will need to configure it by accessing Distance Banking ([BS Online](#) or Sabadell Móvil) in the section "Cards"
